

**Harry Lauder's Walking Stick (tree form)**

*Corylus avellana 'Contorta (tree form)'*

Height: 10 feet

Spread: 10 feet

Sunlight: ○ ●

Hardiness Zone: 5a

Other Names: European Filbert, European Hazel

**Description:**

A very popular accent shrub with twisted, contorted branch growth raised up on a single trunk; quite a strong accent in both summer and in winter when the bare branches are at peak visibility; cut branches are excellent in floral arrangements

**Ornamental Features**

Harry Lauder's Walking Stick (tree form) is draped in stunning brown catkins hanging below the branches from late winter to early spring before the leaves. The flowers are excellent for cutting. It has dark green deciduous foliage. The crinkled round leaves turn yellow in fall. The twisted dark brown bark and brown branches are extremely showy and add significant winter interest.

**Landscape Attributes**

Harry Lauder's Walking Stick (tree form) is a deciduous dwarf tree with a strong central leader and a more or less rounded form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a high maintenance dwarf tree that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Suckering

Harry Lauder's Walking Stick (tree form) is ideal for use as a garden accent or patio feature, and is recommended for the following landscape applications;

- Accent
- General Garden Use

### **Planting & Growing**

Harry Lauder's Walking Stick (tree form) will grow to be about 10 feet tall at maturity, with a spread of 10 feet. It tends to be a little leggy, with a typical clearance of 3 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This dwarf tree does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
