

Sullivan Falsecypress

Chamaecyparis lawsoniana 'Sullivan'

Height: 40 feet

Spread: 30 feet

Sunlight:

Hardiness Zone: 5a

Other Names: Oregon Cedar, Port Orford Cedar

Description:

A large growing tree, this pyramidal evergreen features attractive, dark blue-green foliage on gracefully pendulous branches; hardy, and resistant to winter burn; excellent as a large articulation element in the landscape

Ornamental Features

Sullivan Falsecypress has bluish-green foliage. The scale-like leaves remain bluish-green throughout the winter. Neither the flowers nor the fruit are ornamentally significant. The shaggy indian red bark adds an interesting dimension to the landscape.

Landscape Attributes

Sullivan Falsecypress is an evergreen tree with a strong central leader and a distinctive and refined pyramidal form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance tree. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Sullivan Falsecypress is recommended for the following landscape applications;

- Accent
- Vertical Accent

Planting & Growing

Sullivan Falsecypress will grow to be about 40 feet tall at maturity, with a spread of 30 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and should not be planted underneath power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 70 years or more.

PLANT FINDER

If you haven't been to Oakland Nursery, you simply haven't been to a nursery!

This tree does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type, but has a definite preference for acidic soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selection of a native North American species.
