PLANT FINDER

E.T. Gold Wintercreeper Euonymus fortunei 'E.T. Gold'

Height: 4 feet

Spread: 5 feet

Sunlight: O

Hardiness Zone: 4b

Other Names: Wintercreeper Euonymus

Description:

A spectacular mounded garden shrub featuring dark green evergreen leaves with prominent golden yellow margins, very colorful all season long; a versatile and adaptable color accent for a wide variety of landscape applications

Ornamental Features

E.T. Gold Wintercreeper has attractive gold-variegated dark green foliage on a plant with a round habit of growth. The glossy oval leaves are highly ornamental and remain dark green throughout the winter. It produces pink capsules from mid to late fall.

Landscape Attributes

E.T. Gold Wintercreeper is a multi-stemmed evergreen shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

E.T. Gold Wintercreeper is recommended for the following landscape applications;

Planting & Growing

E.T. Gold Wintercreeper will grow to be about 4 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub performs well in both full sun and full shade. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.
