Hillside Upright Dwarf Blue Spruce\* Picea pungens 'Hillside Upright'

Height: 20 feet

Spread: 15 feet

Sunlight: O

Hardiness Zone: 2a

Other Names: Blue Colorado Spruce; Colorado Blue Spruce

### **Description:**

A high quality evergreen accent tree with dense branching and needles ranging from yellow-green new growth to sea green at maturity; extremely hardy and rugged, makes an excellent windbreak

### **Ornamental Features**

Hillside Upright Dwarf Blue Spruce is primarily valued in the landscape for its distinctively pyramidal habit of growth. It has attractive bluish-green evergreen foliage which emerges chartreuse in spring. The needles are highly ornamental and remain bluish-green throughout the winter. The rough gray bark adds an interesting dimension to the landscape.

#### Landscape Attributes

Hillside Upright Dwarf Blue Spruce is a dense evergreen tree with a strong central leader and a distinctive and refined pyramidal form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance tree. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Hillside Upright Dwarf Blue Spruce is recommended for the following landscape applications;

- Accent
- Vertical Accent
- Hedges/Screening
- Windbreaks and Shelterbelts

## **Planting & Growing**

Hillside Upright Dwarf Blue Spruce will grow to be about 20 feet tall at maturity, with a spread of 15 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 80 years or more.

This tree should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.
